

# ODS BANKS REDUCTION POTENTIAL BY 2015

## BY SUBSTANCE

## BY SECTOR

Million tonnes of CO<sub>2</sub>-equivalent per year

**CFCs** 10%

**HCFCs** 28%

**HFCs** 62%

Medical aerosol  
Foams  
Transport refrigeration  
Industrial refrigeration  
Domestic refrigeration

15% Mobile air conditioning

17% Stationary air conditioning

25% HFC-23 by-product

34% Commercial refrigeration

If no reduction measures were taken, 2009-2015 emissions from ODS banks could exceed all reductions achieved in 4 years under the Kyoto Protocol (2008-2012).
